

Founding Restaurant

PROGRAM & EARLY-ADOPTER OFFER

SaveNeighbor is building a different model for local delivery.

Customers order and pay restaurants directly. Restaurants build their own networks of delivery drivers and local helpers. When a customer needs delivery, they can send a request to that network.

Restaurants that join during our early launch will receive permanent Founding Restaurant status and additional benefits for helping us prove the model.

FOUNDING RESTAURANT BENEFITS

01 Direct founder access

Founding restaurants will receive direct access to the founder for questions, feedback, and troubleshooting throughout the pilot.

02 Free promotional materials

You will receive materials to introduce SaveNeighbor to your customers and drivers, including:

- Counter cards
- Customer bag stickers
- Driver recruitment materials
- A permanent driver-join QR code

03 Launch-period promotion

Founding restaurants may be featured in:

- SaveNeighbor neighborhood campaigns
- Local restaurant guides
- Social media content
- Blog and press materials
- Direct-ordering promotions

Participation in individual features or publicity will always be optional.

04 Permanent preferred pricing

Founding restaurants will receive preferred pricing when paid restaurant plans are introduced.

Your founding rate will remain lower than the standard rate for comparable usage for as long as the original restaurant location remains active.

05 Direct influence on the product

Founding restaurants will have a direct line to the founder and early input into:

- Restaurant tools
- Delivery-network features
- Customer request flows
- Promotional materials
- Future plans and pricing

Feedback will receive priority consideration, though specific feature requests cannot be guaranteed.

06 Priority access and support

Founding restaurants will receive:

- Early access to relevant new features
- Priority troubleshooting
- First consideration for neighborhood promotions
- Opportunities to participate in pilot programs and partnerships

YOUR NETWORK REMAINS YOURS

SaveNeighbor is built to help restaurants create lasting relationships, not rent the same connections repeatedly. Founding restaurants will be able to export their restaurant and delivery-network information if they decide to leave the platform.

The House Terms

WHAT WE ASK IN RETURN

Founding restaurants agree to make a reasonable early effort to test the model by:

01	Create and publish Creating and publishing a restaurant profile
02	Display the materials Displaying SaveNeighbor materials during the pilot
03	Invite delivery workers Inviting existing drivers and suitable local delivery workers
04	Introduce the option Introducing the option to interested customers
05	Share feedback Participating in two short feedback conversations
06	Let us measure Allowing SaveNeighbor to measure requests, acceptances, and completed deliveries

There is no obligation to provide a testimonial. We will only request one if SaveNeighbor has earned it.

HELP BUILD A DIFFERENT DELIVERY MODEL

Third-party delivery apps make restaurants rent access to customers and drivers one order at a time.

SaveNeighbor helps restaurants make those connections permanent.

Founding restaurants will help shape that model from the beginning—and receive benefits unavailable to restaurants that join later.
